STRATEGY/BUSINESS

Fabienne BERTHET

Expert, Innovation Management and Business Development in Healthcare

As a consultant since 2015, Fabienne supports innovative projects in healthcare by coaching start-ups to design and develop their business mode and managing consulting missions in innovation and strategy within pharma, biotech, high-tech and for investment organizations.

She is a member of the knowledge committee of Cap Digital (French digital business cluster) and an EIT Health France listed consultant.

Previously, she has gained strong experience in competitive intelligence in a mid-sized pharmaceutical company, both as information director acting as business partner to R&D and commercial affiliates and as scientific intelligence director supporting corporate strategy and business development.

She has a scientific background in chemistry (PhD) completed by an executive MBA (ESSEC and Mannheim).

STRATEGY/BUSINESS

Nana BIT-AVRAGIM
*CSO | Chairwoman, Advisory Board at
XPOMET©*

Dr. Nana Bit-Avrágim is a medical sciences expert and digital health strategist. Nana is passionate about new life sciences technologies and believes that innovation means adapting to the future.

Building novel digital products, Nana is currently leading strategic business development as Chief Strategy Officer and Chairwoman of the Advisory Board at XPOMET© - Medicinale, the new national platform for the next gen healthcare ecosystem.

To translate the latest global technological developments into life sciences and align it with the healthcare industry, Nana has successfully developed and executed a broad scope of innovative programs and partnerships between SMEs, NGOs and academia in her previous roles as Director of Entrepreneurship and Innovation at Charité Foundation and Head of Digital Health & Life Sciences program at the German hub of Singularity University, an executive education organization based on NASA Research Park in Silicon Valley.

Nana enjoys communicating across borders and cultures and she loves tweeting about digital health, medical innovations and open science.

INTELLECTUAL PROPERTY PROTECTION

Karine CURUTCHET
Patent Engineer, Ex Materia

After a "Biochemistry and Biotechnologies" bachelor's degree, Karine graduated with a Master's degree in this specialty, with an option "Intangible and Information Technology Law". Karine continued her studies with the CEIPI "Patent" and "Trademarks and industrial designs" courses.

Following an experience in an industrial property department of an automotive supplier, Karine joined the EX MATERIA patent law firm and is now in charge of drafting patent applications, validity studies, and replying to official letters.

INTELLECTUAL PROPERTY PROTECTION

Christophe LEVEILLE
CEO, Ex Materia

Engineer graduated from the IPHC engineering school, Christophe has many years of experience in the automotive industry. His responsibilities within a large French automotive supplier have enabled him to develop a pragmatic vision in the support, valorization and defense of innovations.

With this experience, Christophe undertook to co-found the EX MATERIA patent law firm with the aim of proposing an innovative approach to traditional methods, taking as a pillar the valorization of ideas developed within R & D teams of SMEs or large groups International organizations.

Christophe is able to practice before the French national patent office and the EPO. He also developed a significant expertise in oral proceedings. He has acquired expertise in national and international accounting, including risk assessment, advising decision-makers, trading methods and the environment.

STRATEGY/BUSINESS

Gilles MAUTIN
President and co-founder, The Cantillon

Gilles is an entrepreneur and intrapreneur. He has 20 years of experience in the B2B services sector, founded 3 startups. He brings innovative offers to the market. He is known for his excellent business development skills and energy. He is highly skilled at coaching and driving people to change. He holds an Executive MBA from INSEAD.
